

## Geometry CP 2024 Summer Packet

Name: \_\_\_\_\_

**Please SHOW ALL THE WORK in the space provided. Be sure to circle your answers.** This packet is to help you review topics that are considered to be prerequisite knowledge upon entering Geometry CP. To ensure that the good skills you developed this year in your Algebra 1 course do not disappear this summer, working on this packet is a requirement to be completed over the summer. It is **NOT** recommended to complete immediately following school dismissal in June or the night before the packet is due. Student learning is most effective if the packet is completed over the months of July and August. Geometry CP students will be tested on the materials covered in this packet within the first few weeks of school once the teacher has discussed the packet in the classroom.

**Recall Exponents Review Rules:**

Product of Powers

$$x^m \cdot x^n = x^{m+n}$$

$$x^3 \cdot x^2 = x^5$$

Power of a Quotient

$$\left(\frac{x}{y}\right)^m = \frac{x^m}{y^m}$$

$$\left(\frac{2}{3}\right)^2 = \frac{2^2}{3^2} = \frac{4}{9}$$
